

Lighting Suitability *Audit*

A professional auditing service to solve the frustrations of poor lighting issues and confirm that your buildings comply with regulations.

The Audit

We have developed this audit based on the lighting requirements of Reg. 8 of the Workplace (Health, Safety and Welfare) Regulations 1992.

Our audits identify:-

- Whether each workplace has suitable and sufficient lighting.
- The extent of natural lighting (the preferred choice) and whether this is adjustable.
- Provisions for emergency lighting.

The audit will allow the lighting levels at workstations, circulation routes and other work locations to be compared:-

- Against each other
- Against design guidance
- Against a benchmark

This audit is ideal for determining whether the lighting is suitable:-

- For its function
- For ambulant persons
- For disabled persons

The Report

We provide a full written report stating the audit results and the changes suggested.

Our report will compare a range of properties against a benchmark, to clearly identify the best and worst. Each individually listed building is scored, ranked and ordered. We comment on any specific opportunities or problems and will detail where the lighting falls below a reasonable (benchmark) standard.

Our analysis explains in concise and concrete terms exactly where changes are needed.

We include a risk assessment so that hazardous areas can be prioritised and we detail full budget costs to help you programme any necessary remedial work.

With mass you benefit from our specially designed software, created for audit purposes.

To find out how mass can help you, or to make a general enquiry, please contact us on 01344 304000 or email info@mass-services.com

Areas Covered Include

Artificial Lighting

- Type
- Suitability
- Positioning
- Light Levels
- Coverage
- Sufficiency
- Glare
- Lighting Control

Natural Lighting

- Suitability
- Light Levels
- Adequacy of Lighting
- Lighting Control
- Glare

Emergency Lighting

- Type
- Suitability
- Light Levels
- Coverage
- Locations
