

Security Review

A professional audit of security procedures and systems, aimed at the best possible protection of your premises

Introduction

Security breaches from inadequate procedures and systems can mean that your resources are needlessly wasted on replacement of staff or vital equipment. This is money that could better be spent on services.

Delivering better protection to your premises results in better patient services.

The Audit

This mass audit allows buildings and / or departments to be surveyed independently.

It takes into account the location, use, design and the perceived risk at each property, noting security 'hot spots' such as drug storage and reception areas.

We undertake a consultation with the site manager in order to establish any recent or ongoing security issues, for example, recent break-ins or threats to staff.

The Report

The results are recorded in a full written report, with our summary of conclusions. We highlight problem areas and suggest

areas for improvement. Our recommendations are specific to each site, with overall comparison and ranking of the whole estate if applicable.

We include an explanation of the benefits of suggested improvements in technology or equipment.

To find out how mass can help you, or to make a general enquiry, please contact us on 01344 304000 or email info@mass-services.com

We Review
