

# Work Equipment Audit

A professional audit service to confirm compliance with the Work Equipment Regulations 1998.

## The Regulations

Under the Work Equipment Regulations 1998 employers must ensure that any work equipment is constructed / adapted to be suitable for its purpose, and used only for its intended purpose and under suitable conditions. Account must be taken of health and safety risks at the premises and any additional risks posed.

Equipment must be properly maintained and a log kept. Use of certain equipment is restricted to appropriately trained persons and the equipment must be maintained by suitably qualified persons.

All equipment users should receive adequate health and safety training, identifying risks.

## The Audit

We have included a risk assessment and full budget costs so that you can programme any necessary remedial work.

## Data Presentation

In our reports we specifically list each item of equipment and confirm its suitability. We comment on specific problems, identifying potential risks and required remedial actions.

At mass we create reports using our own specially designed software, which allows monitoring of the register of components and systems, and record keeping of maintenance.

To find out how mass can help you, or to make a general enquiry, please contact us on 01344 304000 or email [info@mass-services.com](mailto:info@mass-services.com)

## The Audit covers

- Suitability of Work Equipment
- Maintenance
- Inspection
- Specific Risks
- Information and Risks Training
- Community Requirements
- Dangerous Parts of Machinery
- Protections against Hazards
- Very High or Low Temperatures
- Operating Conditions
- Stop Controls
- Emergency Stop Controls
- Isolation from Energy Source
- Stability
- Lighting
- Maintenance Operations
- Markings
- Warnings
- Mobile Equipment
- Self-propelled Equipment
- Remote-controlled Equipment
- Drive Shafts
- Power Presses
- Guards and Protection Devices
- Reports
- Keeping Information

And more.....
