BUSINESS UNITS

Mass Software provides software for the built environment including lifecycle planning, facilities, property and estates management, and asset & project management software solutions to improve business management process and procedures

Mass Training offers an extended list of courses to cover continual performance development including software package courses as well as personal soft skills throughout the UK. With an ever growing list, there is a course for everyone

Mass Support provides ongoing support with new web enabled access for not only our products and services but client support on a continual basis. We specialise in both reactive and on site support in order to really make your systems go the extra mile

BUSINESS UNITS

Mass Services offers an improved selection of IT solutions including data solutions, Implementation and project management. Through targeting the importance of data validation, we help your company to be up to date and in control

Mass Development can help increase business productivity through bespoke web and application development, integration, web based management intelligence and handheld and mobile solutions

Mass Resourcing combines our training facilities with our resourcing centre in order to provide custom recruitment solutions to fit in with your business requirements. Whether you need temporary or permanent positions filled, we can find the right person for the job.
